

EHM Personal Protective Equipment Recycling.

EHM are proud to announce the collaboration with a Nationwide Personal Protective Equipment Recycling company to actively assist our customers with a secure, safe, and environmentally friendly solution to disposing of all your PPE.

As a Supplier of goods within the UK we are aware that some items of PPE supplied have a limited life span and sometimes for hygiene reasons deemed as 'single use' or are difficult to dispose of.

We felt that it was important to encourage our customers to embrace environmental initiatives by reducing the amount of PPE entering landfill.

Our provider will arrange for collection that suits your time frame from their bespoke consoles and will arrange disposal of all PPE ethically using a tier system approach to all PPE products. They will issue you with a certificate of destruction to assist with your auditing processes of proper waste disposal.

To find out how EHM can help you achieve this please email our Quality and Environmental Department on amvl@ehmltd.co.uk.
